

NEW ELECTRIC SPREADER ATTACHMENT

Now you can aerate and spread material in one pass when you capitalize on the versatility of the Classen SA30 stand-on aerator by installing an optional Spyker® 120-lb. commercial electric spreader. It features an exclusive Classen mount that provides an optimized impeller height for quality spreading. The custom package is well equipped featuring spreader controls conveniently located near the control panel for ease of operation. A powerful, 12-volt DC motor is mounted and protected by corrosion-resistant stainless steel.

The motor is mounted outside of the large hopper for easy material loading. It delivers a true, 120-lb. capacity to help you get the job done quicker, with fewer refills and improved system reliability. This electric spreader comes standard with a Variable Speed Control—mounted conveniently within arm’s reach—to control the spread swath of up to 16 feet.

The design of the 120-lb. spreader enables it to project enhanced spread coverage while maintaining perfect equilibrium using the on-the-fly AccuWay™ adjustment cable. The AccuWay™ adjusts the material flow forward or backward, which allows the operator to maintain a perfectly balanced spread pattern, regardless of the chosen material.

The mounting kit is custom designed to fit on the Classen SA30 stand-on aerator for simple and accurate installation. No cutting, drilling or fabrication is necessary to secure the attachment.

SPECIFICATIONS

Item #970640

Hopper Capacity	120 lb (54 kg) Polypropylene
Hopper Cover	Included
Hopper Screen	Included
Spread Pattern	Accu-way System
Spread Width	4' to 12' (1219 to 3658 mm)
Dimensions(L x W x H): ..	19" x 24" x 23" (482.6 x 609.6 x 584.2 mm)
Motor	12 Volt DC
Gate Control	Hand Actuator
Ship Weight.....	42.0 lb (19.05 kg)

Specifications subject to change without notice.

A powerful, 12-volt DC motor is mounted outside of the large hopper for maximum capacity and is protected by corrosion-resistant stainless steel.

The mounting kit is custom designed to fit on the Classen SA30 stand-on aerator for simple and accurate installation. No cutting, drilling or fabrication is necessary to secure the attachment.
